### Cosmo Introduces Domestic Biodiesel “Cosmo CF-5” and “Cosmo Zero Carbon Credit” Package for Buses Operating Out of Sotetsu Bus’s Asahi Bus Depot

Cosmo Energy Group companies—Cosmo Oil Marketing Co., Ltd. (hereafter, “the Company”) and COSMO ENERGY SOLUTIONS COMPANY LIMITED—in collaboration with SORITSU KOSAN CO., LTD., have begun supplying domestically produced biodiesel fuel, “Cosmo CF-5<sup>1</sup>,” to buses operated out of Sotetsu Bus Co., Ltd.’s Asahi Bus Depot, from March 18, 2025. Concurrently, the companies plan to offset carbon dioxide (CO<sub>2</sub>) emissions from the diesel component of Cosmo CF-5 using the “Cosmo Zero Carbon Credit<sup>2</sup>” service.

#### ■Flowchart of this Initiative

This initiative aligns with the Sotetsu Group's Environmental Vision, aiming to reduce CO<sub>2</sub> emissions and realize a circular society through the use of biofuels. Used cooking oil collected from Sotetsu Bus's employee cafeterias will be utilized in refining and producing Cosmo CF-5. This approach supports the recycling of regional resources while minimizing the environmental impact of fuel used in bus operations.

Furthermore, CO<sub>2</sub> emissions from the diesel fuel contained in Cosmo CF-5 will be offset through the concurrent use of the Cosmo Zero Carbon Credit service. This effort reduces environmental impact through a three-pronged approach: utilizing biodiesel fuel, recycling regional resources, and implementing carbon offsetting.

The Cosmo Energy Group supports the Sotetsu Group's Environmental Vision and is committed to actively pursuing business activities such as those aimed at reducing greenhouse gas emissions.

Asahi Bus Depot

Bus that runs on Cosmo CF-5

1. Cosmo CF-5 is a biodiesel fuel made by blending 5% C-FUEL—a high-quality, reliably supplied product developed using REVO International Inc.'s proprietary technology and extensive expertise—with diesel fuel refined and produced by Cosmo Oil Co., Ltd.
2. Cosmo Zero Carbon Credit supports customers' decarbonization efforts and enhances enterprise value by utilizing the J-Credit Scheme to offset CO<sub>2</sub> emissions from fuel oil sold by the Company. Customers can begin J-Credit trading without the need for prior preparations, such as registering as a participant on the JPX Carbon Credit Market or setting up a J-Credit account, as the Company handles J-Credit procurement on their behalf.
