**Cosmo Oil Marketing to Supply 100% Renewable Energy-Derived Electricity
to 17 Facilities in Oiso Town
~Reducing CO2 Emissions by Approximately 1,500 Tons (73%) Annually
Across Municipal Facilities~**

Cosmo Energy Group company Cosmo Oil Marketing Co., Ltd. (hereafter, “Cosmo Oil Marketing”) will begin supplying 100% renewable energy-derived electricity to 17 municipal facilities, including the town hall building and elementary and junior high schools, in Oiso Town, Kanagawa Prefecture, from April 1, 2025.

In 2023, Oiso Town declared itself a “Zero Carbon City” and has been working toward building a decarbonized society to promote sustainable urban development, with the goal of achieving net zero carbon dioxide (CO2) emissions by 2050.

To support the realization of this commitment, Cosmo Oil Marketing will offer its renewable energy-derived electricity plan, Cosmo Denki (Electricity) Business Green¹, to Oiso Town facilities covered under the agreement. The plan provides renewable energy-derived electricity, endorsed by a non-fossil certificate with tracking information linked to a renewable energy source that falls under Japan’s Feed-in-Tariff (FIT) scheme, such as wind power generated by Cosmo Eco Power Co., Ltd., a Cosmo Energy Group company.

Oiso Town Hall building, to which Cosmo Oil Marketing will begin supplying renewable energy-derived electricity

With the introduction of Cosmo Denki (Electricity) Business Green, annual electricity consumption of approximately 3.18 million kilowatt-hours (kWh) by 17 Oiso Town facilities will be converted to renewable energy-derived electricity, with an expected annual CO₂ emissions reduction of around 1,500 tons². This equates to approximately 73% of the CO₂ emissions from the town's administrative operations.

Going forward, Cosmo Oil Marketing remains committed to supporting local governments and companies in reducing their environmental impact and will continue to undertake various initiatives toward the realization of a decarbonized society.

1. About Cosmo Denki (Electricity) Business Green

Cosmo Denki (Electricity) Business Green is a service that helps businesses achieve virtually zero CO₂ emissions by providing them with added environmental value in the form of non-fossil certificates and other designated renewable energy certificates. Customers purchase such certificates with a value equivalent to or greater than their total annual sales volume as part of the electricity sales process, thereby receiving proof that all the electricity they use offers environmental value derived almost entirely from renewable energy sources. Since its launch in 2020, the service has been utilized mainly by corporations and local governments seeking to decarbonize their operations. Furthermore, Cosmo Zero Carbon Solution offers a one-stop solution that encompasses renewable energy as well as complementary products and services such as electric vehicles (EVs).
